Art Unit: 1625

## **DETAILED ACTION**

## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to the fungicidal mixture comprising as active compounds an amide compound of the formula I where A is as claimed, R1 is as claimed, R2 is unsubstituted phenyl or phenyl substituted with all the groups claimed except that it can't be condensed, and a compound of formula III, a compound selected from the group consisting of a compound of formula IV, a dinitrile of formula VIII, and containing an active ingredient of formulas Via, Vib or VII, and contaminating an ingredient of formulas IX a or IXb, classified in class 546, subclass 337.
- II. Claims 1-11, drawn to the fungicidal mixture comprising as active compounds a compound of formula I where A is as claimed, as is optionally substituted as claimed, , R1 is as claimed, R2 is an optionally substituted phenyl condensed with a saturated 5-membered carbocyclic ring which is optionally substituted with alkyl groups, and containing a compound selected from the group consisting of a compound of formula III and IV, and dinitrile of formula VIII, containing an active ingredient of formulas Via, Vib or VII, and contaminating an ingredient of formulas IX a or Ixb, classified in class 546, subclass 337.
- III. Claims 1-11, drawn to the fungicidal mixture comprising as active compounds a compound of formula I where A is as claimed, as is optionally substituted as claimed, , R1 is as claimed, R2 is unsubstituted phenyl or phenyl substituted with

Application/Control Number: 10/044,255

Art Unit: 1625

all the groups claimed except that it can't be condensed, and a compound selected from the group consisting of a compound of formula III and IV, a dintrile of formula VIII, and containing an active ingredient of formulas Via, Vib or VII, and contaminating an ingredient of formulas IX a or Ixb, classified in class 546, subclass 337.

The inventions are distinct, each from the other because of the following reasons:

1. In the instant case the different inventions have achieved a separate status in the art, have separate fields that aren't coextensive, and are capable of supporting separate patents. Further, a prior art reference that would anticipate the claims under 35 USC 102(b) would not render obvious the same claim(s) under 35 U. S. C. 103 (a) with respect to another member. Searching the entire genus would be a burden on the USPTO in terms of time and expense. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper..

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Claims 1-11 are generic to a plurality of disclosed patentably distinct species comprising A, R1 and R2, R. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to

Application/Control Number: 10/044,255

Art Unit: 1625

be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

A telephone call was made to Herbert Keil on 6/16/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Binta M. Robinson whose telephone number is (703) 306-5437. The examiner can normally be reached on M-F (9:30-6:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Alan Rotman can be reached on (703)308-4698. The fax phone numbers for the organization where this application or proceeding is assigned are (703)308-7922 for regular communications and (703)308-7922 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703)308-0193.
